

## What you will find on my web site?

Welcome in virtual CPU museum. My name is Marcin Majewski. Passion, a lot of work and dedicated time influenced to rise this huge (probably biggest in Poland) collection of old microprocessors. Collecting started since December 2004. Service is online since January 2005. Huge upkeep this service and collecting require a lot of funds so I will be grateful for buying contribution items or very beautiful and rare CPU.

What you can to do with old processors ?

It is very easy. I'm CPU collector. Old microprocessors have value for me. I'm looking for everything what I haven't for the present. If you have CPU or FPU which I have already and still you would like to give me so I will be grateful and will take it. Funds received from sale I will intend toward service upkeep. Sometimes I have very nice experience with people which donate my collection. I marked them on main page.
